ALPINESTARS SUPERTECH M10® Professional Helmet

The S-M10's design is coherent to Alpinestars philosophy and shares distinctive themes with other products in the portfolio; a smooth, attractive, profile which is streamlined and free of any external channels and features that might act as a load point in an impact, or compromise the overall integrity of the construction. The surface curvature promotes reduced friction on impact, allowing deflection and the most efficient transfer of energy to protect the rider's head from direct force to the skull and referred to the neck and spinal column. The aperture is designed to accommodate a wide variety of goggles and the air vents in the shell are located to maximize ventilation efficiency.

The S-M10 shell has been profiled with performance as a priority and with a design style that identifies the profile of the helmet and its sculpted surface as uniquely 'Alpinestars'.

Another key feature is the S-M10 shell sizing solution; each helmet fit size has

its own appropriate shell size to deliver the most anatomical solution for the wide variety of fit needs worldwide.

The helmet's shell construction utilizes a highly advanced molding technology with a multi-composite combination: - 3K Carbon, high density carbon outer layer that improves strength and efficiency of energy dissipation over the shell.

Uni-directional carbon composite layer that gives significantly greater radial strength around the shell, preventing compression but allowing controlled deflection for reducing transmitted impact energy. Aramid fiber layer which provides critical penetration protection.

This combination of layers is given even greater performance with an epoxy resin bonding that offers the best possible strength and energy management; limited outer shell deflection means the energy spreads wider and is better absorbed by the EPS liner.

S-M10

The result of the unique shell lay-up process employed in the S-M10 construction results in extremely effective impact protection. With a fully equipped helmet testing facility, within Alpinestars Racing Development Center, an exhaustive impact research program has resulted in the Supertech M10 returning linear and oblique impact performance which far improves upon current helmet regulation standard limits. For direct, linear, impact by an average magnitude of 41% and for rotational acceleration, oblique, impact performance by an average of 48%.

ALPINESTARS SUPERTech M5® Helmet

The all-new SM5 helmet is the result of more than five years of intensive study, development and testing. We scrutinized every possible aspect to engineer a helmet that is safe and thoughtfully designed to deliver optimal protection and comfort. This lightweight helmet features a thermo-injected shell incorporating a special polymer blend enhanced by varying degrees of thickness that is engineered to deliver the optimal combination of impact protection and light weight, while the five density EPS liner ensures the correct density in the correct area for enhanced impact absorption.

An engineered raised area with padding effectively reduces the forces transmitted to the collarbone and a patented visor release system that ensures

the visor is released with the correct pre-determined amount of force, irrespective of the angle of impact.

Lightweight outer shell is constructed from a technologically advanced impact resistant thermoplastic in two sizes.

The inner and outer surfaces are engineered to minimize the effects of oblique impacts.

Multiple density inner liner to ensure the correct density in the correct area for enhanced impact absorption

Patented visor release system ensures the visor is released with the correct pre-determined amount of force, irrespective of the angle of impact.

SM5

Maximized ventilation and high levels of heat transfer exchange thanks to multi-air inlets and exhaust ports.

The visor has been designed to direct air into the ports for enhanced airflow.

+ Supertech is Alpinestars innovative Pro Level Motocross apparel line, designed for superior dirt riding performance. Supertech gear offers a Factory Rider design, featuring an extremely lightweight, almost compression style fit. When it comes to the jersey and pants, and their improved ergonomic cuts designed to enhance body movement on the track, the Supertech gear fits like a second skin. With an engineered design for an athletic race fit, a chassis consisting entirely of advanced stretch mesh and an ultra-lightweight construction, the Supertech Jersey is Alpinestars lightest ever MX jersey. Featuring a host of SX and MXGP race-proven technologies, the Supertech Jersey delivers optimum levels of flexibility, freedom of movement, ventilation, durability, and comfort.

- + 1. Premium athletic performance race fit designed for aggressive riding and professional levels of movement, flexibility, and comfort.
- + 2. The MX24 Supertech Jersey includes new stronger materials engineered to be ultra-lightweight, stretchable, and durable, while also delivering superior airflow thanks to the highly breathable Stretchnet zones on the full torso and back.
- + 3. Strategically positioned laser-cut perforations throughout the upper and lower arms, sides, and armpit area provide additional airflow and ventilation.
- + The jersey has an ergonomic cut and optimized pattern for enhanced freedom of movement and superior mobility.
- + Innovative Stretchnet construction on the full chest and back provides extensive stretch and strength while providing premium ventilation.
- + Flat stretch construction on arms and shoulders for the enhanced range of movement and rider comfort.
- + Innovative construction utilizes no side seams, no elbow seams, and no underarm seams for maximum rider comfort.
- + Seamless bonded collar and cuffs for enhanced rider comfort.
- + Extended back panel length for greater coverage on the back.
- + SX and MXGP racing-inspired shoulder details and new brand application.
- + Sublimated, dyed, or digital print fade-resistant graphics.

SUPERTECH SPEK JERSEY

**SUPER
TECH**

size price
S - 2XL \$89.95

+ Supertech is Alpinestars innovative Pro Level Motocross apparel line, designed for superior dirt riding performance. Supertech gear offers a Factory Rider design, featuring an extremely lightweight, almost compression style fit. When it comes to the jersey and pants, and their improved ergonomic cuts designed to enhance body movement on the track, the Supertech gear fits like a second skin. With an engineered design for an athletic race fit, a chassis consisting entirely of advanced stretch mesh and an ultra-lightweight construction, the Supertech Jersey is Alpinestars lightest ever MX jersey. Featuring a host of SX and MXGP race-proven technologies, the Supertech Jersey delivers optimum levels of flexibility, freedom of movement, ventilation, durability, and comfort.

+ 1. Premium athletic performance race fit designed for aggressive riding and professional levels of movement, flexibility, and comfort.

+ 2. The MX24 Supertech Jersey includes new stronger materials engineered to be ultra-lightweight, stretchable, and durable, while also delivering superior airflow thanks to the highly breathable Stretchnet zones on the full torso and back.

+ 3. Strategically positioned laser-cut perforations throughout the upper and lower arms, sides, and armpit area provide additional airflow and ventilation.

+ The jersey has an ergonomic cut and optimized pattern for enhanced freedom of movement and superior mobility.

+ Innovative Stretchnet construction on the full chest and back provides extensive stretch and strength while providing premium ventilation.

+ Flat stretch construction on arms and shoulders for the enhanced range of movement and rider comfort.

+ Innovative construction utilizes no side seams, no elbow seams, and no underarm seams for maximum rider comfort.

+ Seamless bonded collar and cuffs for enhanced rider comfort.

+ Extended back panel length for greater coverage on the back.

+ SX and MXGP racing-inspired shoulder details and new brand application.

+ Sublimated, dyed, or digital print fade-resistant graphics.

+ Developed and tested on some of the toughest terrains around the globe, the Racer gear is ideal for many forms of off-road riding thanks to the ergonomic patterns pre-curved sleeves and leg construction, and the new moisture-wicking, lightweight, and durable technical materials. Featuring an extremely lightweight and durable main chassis, the sport cut Racer Jersey features a multi-material construction with breathable mesh inserts for enhanced airflow and an ergonomic cut to provide enhanced body movement.

- + 1. Advanced stretch poly-fabric construction is lightweight, and made of anti-microbial, moisture-wicking and stretch material in key areas.
- + 2. Ergonomically engineered sport fit and pattern for enhanced freedom of movement and superior mobility.
- + 3. Strategically positioned stretch inserts for an enhanced fit and superior freedom of movement.
- + Poly-fabric construction for durability, with mechanical stretch for rider comfort.
- + Breathable stretch and mesh inserts on side and under the arms for enhanced breathability and airflow.
- + Featuring a more open, relaxed fit collar.
- + Cut longer in the rear for greater coverage when riding.
- + Fade resistant graphics.

- + Developed and tested on some of the toughest terrains around the globe, the Racer gear is ideal for many forms of off-road riding thanks to the ergonomic patterns pre-curved sleeves and leg construction, and the new moisture-wicking, lightweight, and durable technical materials. The sport cut Racer Pants offer optimized levels of comfort and performance in the riding position, thanks to their lightweight chassis, extensive stretch panels and pre-curved leg design.
- + 1. Main chassis constructed from an advanced blend of stretch rip-stop fabric and 600D poly-fabric with reinforcement coating for enhanced stretchability and durability.
- + 2. Main material is engineered to be lightweight, stretchable, and durable, while also delivering superior airflow thanks to the highly breathable Stretchnet zones.
- + 3. New ergonomic construction with sport cut for a more precise performance fit.
- + Highly breathable Stretchnet zones on the full back of the lower legs deliver superior airflow, comfort, stretchability, and ultra-light weight.
- + Goat leather inner knees for premium feel and durability, as well as for enhanced heat resistance, grip, and comfort.
- + Ratchet closure with waist adjustment straps for a secure, personalized fit.
- + Silicon internal waistline to keep the pants in position.
- + Zippered fly for ease of use.
- + Fade resistant graphics.

STELLA TECHSTAR JERSEY

TECHSTAR

size
XS - XL

price
\$69.95

+ The Techstar line offers a racing-inspired cut for durable advanced-level competition, incorporating new mesh materials for improved stretch and breathability as well as a revised shape for excellent freedom of movement. Featuring a dedicated women's fit, the Stella Techstar Jersey has been specifically adapted to the female figure for optimal riding comfort. With an athletic race fit, the lightweight Stella Techstar Jersey features an updated multi-material construction with a poly-fabric stretch main chassis with ergonomic stretch inserts for enhanced freedom of movement. The jersey's strategically positioned mesh inserts provide enhanced airflow and ventilation and no seams on the side, under the arms, or on the collar for optimized rider comfort. The MX24 Stella Techstar Jersey provides excellent performance and increased durability.

+ 1. Featuring all-new materials that provide high levels of stretch, breathability, and durability, the Stella Techstar Jersey incorporate laser-cut perforations on the chest and arms for added ventilation.

+ 2. Main chassis is constructed from a lightweight, highly durable, moisture-wicking knitted poly-fabric for superior comfort and performance.

+ 3. Ergonomically engineered cut and optimized pattern for enhanced freedom of movement and superior mobility.

+ 4. Strategically positioned stretch inserts for superior freedom of movement.

+ Anatomically engineered for an optimized women's fit.

+ Flat stretch construction on arms and shoulders for enhanced range of movement and rider comfort.

+ Innovative construction utilizes no side seams and no underarm seams for maximum rider comfort.

+ Strategically positioned laser perforations for additional airflow and optimum ventilation.

+ Seamless bonded neck opening for ease of use and enhanced rider comfort and seamless bonded cuffs.

+ Extended rear for greater coverage in the riding position and compatibility with Alpinestars' MX pants.

+ Fade-resistant graphics.

STELLA TECHSTAR PANTS

TECHSTAR

size
26 - 34

price
\$194.95

+ The Techstar line offers a racing-inspired cut for durable advanced-level competition, incorporating new mesh materials for improved stretch and breathability as well as a revised shape for excellent freedom of movement. Featuring a dedicated women's fit specifically adapted to the female figure for optimal riding comfort, the race fit Stella Techstar pants provide an optimum blend of performance and durability, as well as incorporate innovative features such as the new SX2 magnetic closure buckle and an updated 3D Babel knee construction to significantly ramp up ventilation, flexibility, and freedom of movement.

+ 1. The Stella Techstar Pants have a new materials construction and updated pattern delivering a second skin feel and providing premium freedom of movement to the rider.

+ 2. The main chassis is constructed from an advanced blend of stretch rip-stop fabric and 600D poly-fabric for enhanced stretchability and durability, with durable 4-way stretch on the yoke, thighs, and upper knees.

+ 3. Main material is engineered to be ultra-lightweight, stretchable, and durable, while also delivering superior airflow thanks to the highly breathable Stretchnet zones and laser perforations.

+ 4. Revised Babel knee gusset for flexibility and ventilation.

+ 5. The performance-engineered single-layer construction and linerless design offer enhanced wearability, superior comfort, and lighter weight, providing an effortless on and off, even when worn with knee braces or knee guards.

+ 6. Secure and quick new SX2 auto-lock magnetic buckle for optimum waist closure.

+ Anatomically engineered for an optimized women's fit.

+ Stretch mesh materials make the pants more flexible and breathable, and reinforced materials have been used on the seat and knees for enhanced durability.

+ Stretchnet material has been utilized on the backs of the legs bringing airflow comfort and lightweight as well as providing excellent comfort, stretch, and breathability.

+ Goat leather inner knees for premium feel and durability.

+ Elasticated waist with silicon inner waist-line to keep the pants in position.

+ Covered zippered fly for durability.

+ Fade-resistant graphics.

price
\$ 319.95

+ The Techdura line has been designed for the ultimate in off-road performance. Featuring a full gear line including jersey, pants, jacket, gloves, and a modular utility vest, the Techdura gearset redefines the limits and potential in off-road and dual-sport apparel performance in terms of materials, modularity, and fit. The functionality can be attributed to the line's technical 100% durable stretch construction which provide a whole new level of freedom of movement, as well as premium levels of comfort and performance, designed specifically for the enduro and off-road trail riding segment.

+ The Techdura Jacket is highly modular and features technical aspects unique to Alpinestars. Constructed from a durable and rugged stretch polyamide canvas material with detachable raglan sleeves and side torso vents, the Techdura Jacket can be perfectly adapted to the climate, engineered to handle the rigors of enduro and off-road riding. The Techdura Jacket is water-resistant and windproof to protect against the elements and has been designed to fit over any Alpinestars' upper body protectors. The jacket also features a built-in pocket to seamlessly integrate a water bladder.

+ Entirely unique to the Techdura Jacket, is the detachable utility vest that comes included with the jacket. The vest attaches to the back and chest, providing 4 chest pockets with

an airflow space located centrally on the on the front, as well as a back compartment for a separate hydration bladder or other gear.

+ The Techdura Jacket's versatility make it the perfect choice for enduro riders who need to carry different items based on the needs of the ride.

+ Techdura sets a unique new modern standard with its rugged yet stretchy construction to help enduro and off-road riders alike conquer all types of terrain in both comfort and style.

+ 1. Rugged stretch polyamide canvas material for enhanced durability.

+ 2. Water resistant for effective wet weather performance.

+ 3. Stretch paneling for an optimized fit and superior freedom of movement.

+ 4. Side torso vents provide enhanced airflow and breathability.

+ 5. Detachable utility vest provides additional storage, if required.

+ Reinforcements on elbows for additional durability.

+ Detachable raglan sleeves.

+ Magnetic auto lock buckle for a secure closure.

+ Hand pockets for real-world practicality.

TECHDURA TACTICAL PACK

size
S - 3XL

price
\$ 169.95

+ The Techdura line has been designed for the ultimate in off-road performance. Featuring a full gear line including jersey, pants, jacket, gloves, and a modular tactical pack, the Techdura gearset redefines the limits and potential in off-road and dual-sport apparel performance in terms of materials, modularity, and fit. The functionality can be attributed to the line's technical 100% durable stretch construction which provide a whole new level of freedom of movement, as well as premium levels of comfort and performance, designed specifically for the enduro and off-road trail riding segment.

+ The Techdura Tactical Pack provides off-road and enduro riders premium modularity giving them the ability to carry as much or as little along for the ride. The Techdura Tactical Pack is an overall, low profile pack solution to comfortably transport the off-road trailside essentials. Constructed from heavy duty 1000D polyfabric, 450D coated polyfabric, and 3D comfort mesh, the ergonomic Techdura Tactical Pack provides ample carrying capacity thanks to a 5.5-6L fixed main back compartment, and lower chest and lower lateral side pouches offering .75L volume capacity each, for a total of up to 9L of overall carrying capacity. The front and side pouches are removable if desired, allowing the pack to become even more low profile allowing the rider to carry along only the bare essentials.

+ The Techdura Tactical Pack's design allows the rider to centralize and disperse the pack's weight closer to and around the rider's body for better weight distribution and comfort for longer riding stamina, less overall muscle fatigue,

and unobstructed mobility on the bike. For further weight distribution and management, the ergonomic pack has both a large belly buckle and a secure and easy to open and close, magnetic chest buckle, providing a large range of adjustability. The Techdura Tactical Pack features Molle webbing for user attachments like radios or other communication systems and comes included with a water bladder which integrates perfectly within the main compartment. Internally, the pack features multiple compartments specifically designed to organize and carry tools, zipties, tire spoons, patches, phone, and whatever other necessities required while out on the trail.

+ 1. Advanced, multi-material main shell incorporating heavy-duty poly-fabric and ripstop nylon reinforcements on the base for strength and weight-saving, as well as improved durability, abrasion resistance and water resistance.

+ 2. External, detachable pouches on the front and sides for quick and easy access to essentials, allowing the storage volume to be tailored to the rider's requirements.

+ Molle webbing: rows of heavy-duty nylon stitched onto the vest allow for the attachment of various compatible pouches and accessories.

+ Ergonomic shoulder straps with perforated foam padding and mesh panels for an optimized airflow, adjustable and removable chest strap and the Alpinestars magnetic chest buckle for a fast and secure adjustment.

+ Water bladder included.

PROTECTION

BIONIC TECH V3 PROTECTION JACKET

size price
S-2XL \$ 299.95

- + The Bionic Tech V3 Protection Jacket features ultra-lightweight, detachable floating Level 2 CE and UKCA Certified Polyhedron Hybrid Technology chest and back protectors and Level 2 Nucleon Flex Pro shoulder and elbow protectors embedded in a highly breathable, race-proven stretch mesh base layer, to offer riders unsurpassed levels of ventilation and superior upper body protection against impacts.
- + Both the dual-zone chest and back protectors have a rigid central zone with a flexible soft compound around the perimeter and are backed by a soft bio-foam padding. On the chest protector, the flexible soft surround and the bio-foam padding works as an adaptive system that molds to the chest. The central zone of the chest and back protectors directly behind the highly perforated impact grid are completely open to allow for maximum ventilation.
- + The chest and back protectors are securely held in place via adjustable shoulder straps. For ease of putting on and off, the removable chest protector features a quick release-lock magnetic buckle on the left shoulder while the lower securement is actioned via the adjustable V-belts which run through the ventilated rib

- guards. The V shape spreads the tightening force over a wider area of the back protector, resulting in a more secure and comfortable fit. The rib guards offer additional coverage in critical areas.
- + SHOULDER PROTECTORS: EN 1621-1:2012 Level 2
- + ELBOW PROTECTORS: EN 1621-1:2012 Level 2
- + BACK PROTECTOR: EN 1621-2:2014 Level 2
- + CHEST PROTECTOR: EN 1621-3:2018 Level 2
- + Lightest CE Level 2 Chest Protector in its class.
- + 17% of the protector structure consists of ventilation apertures aligned through both hybrid layers to ensure maximum ventilation.
- + Super ventilated with channeling of direct heat build-up away from the chest.
- + Anatomically profiled back protector is highly ventilated and flexible.
- + BNS compatible via removable puck panel and elasticated BNS pull tabs.

- + Chest and back protectors can be detached from the base layer for easy washing of the jacket.
- + Chest can be opened on the left shoulder by a convenient quick-release magnetic buckle providing easy access to the central zipper.
- + V-straps on the lower forearm for ensure a customizable fit while keeping the elbow protector securely positioned.
- + V-straps on the back protector make for a more adaptive fit.
- + Strategically placed EVA foam padding on the upper arms and chest provide improved roost defense.
- + Race-proven breathable and stretchable textiles used for the base layer construction.
- + Floating Chest and Back protectors, and rib guards.
- + Waist strap not attached to back protector.

price
\$ 209.95

- + The Bionic Plus v2 Protection Jacket: Highly Ventilated Protective Armor with Ergonomic and Flexible Cell Technology
- + The ultra-lightweight Honda Bionic Plus v2 Protection Jacket offers excellent upper body protection against impacts. This protector features the all-new Level 2 CELL Technology chest protector for ultra-light weight and superior airflow and ventilation. The super-ventilated Level 2 Nucleon CELL and Flex Hybrid Technology back protector is ergonomically engineered for an enhanced adaptive fit. Both the front and rear protectors are mounted on breathable foam padding for a secure and comfortable fit.
- + The open grid structure of the Nucleon CELL and Flex technology hybrid back protector is engineered to be both ultra-lightweight and ultra-breathable while still guaranteeing optimal protective performance. This Hybrid Technology encompasses the layering of multiple structures resulting in a protector where the whole is greater than the sum of all its parts. The back protector is also equipped with a flexion channel for enhanced mobility, and extra length padding for lower back to offer comfort and greater cover-

age when riding. The chest and back protectors are held securely in position by three strap systems; an adjustable elasticated waist band, adjustable elasticated side straps and elasticated shoulder straps complete with sturdy quick release buckles which once adjusted, locks the protectors securely in position when riding.

- + CELL technology is also applied to the softer formulation shoulder protectors which are mounted on a perforated lightweight chassis, for additional air-cooling performance. The sleeves are constructed with highly abrasion resistant fabric housing Nucleon Flex technology elbow protectors for the optimum blend of flexibility, comfort, and impact protection.
- + The all-new CELL Technology chest protector features a highly perforated shell for high levels of ventilation and protection and comes equipped with floating side wings and a full-length side zipper for ease of use.
- + The all-new CELL Technology back protector is highly perforated for maximum breathability and cooling ventilation and has a flexion channel for enhanced mobility.

- + Adjustable chest to shoulder armor connection straps, with adjustable elastic closure system featuring newly designed, quick, and easy-to-use side buckles that fit a broad range of rider body sizes.
- + Durable stretch main chassis, constructed with soft stretch mesh for breathability, with secure and customizable fit.
- + Padded chassis for optimized levels of comfort and a snug, close-to-body fit.
- + Adjustable waist belt.
- + Bionic Neck Support compatibility with elasticated BNS pull tabs.
- + The Honda Bionic Plus v2 Protection Jacket is CE and UKCA certified.
- + CE certified Chest and Back Level 2.
- + CE certified Shoulders and Elbows Level 1.

BIONIC ACTION CHEST PROTECTOR

size price
M - 2XL \$ 109.95

All-new Cell Technology chest protector features a highly perforated shell for high levels of ventilation and protection.

The flexible construction of the sides adapts to the contours of the body for enhanced fit and comfort.

Features a new Cell Technology back protector with a flexion channel for enhanced mobility.

Removable shoulder pads for high levels of customization.

Extended padding to offer more protection against tire roost without obstructing arm movement.

The protectors are perforated for maximum breathability and cooling ventilation.

Elastic closure system features newly designed, quick and easy-to-use buckles that fit a broad range of rider body SZs.

Thermoformed padded chassis for optimized levels of comfort and a close-to-body fit.

Adjustable shoulder straps for an optimal fit.

Bionic Neck Support compatibility with the BNS A-Strap, available as an optional extra.

According to European statutory law the CE mark is a conformity requirement for the marketing of the product.

The following standard applies:
Level 1 EN 1621-3:2018 (Chest) and
Level 1 EN 1621-2:2014 (Back)

BIONIC TECH YOUTH PROTECTION JACKET

size price
S/M-L/XL \$ 229.95

- + The feature packed Bionic Tech Youth Protection Jacket offers optimum levels of protection and premium rider comfort for young riders. The jacket features a Level 2 CE/UKCA certified detachable floating Polyhedron Hybrid Technology chest protector, an adaptive viscoelastic Level 2 CE/UKCA certified back protector and contoured bio-foam rib guards with a race-proven stretchable mesh base layer to ensure superb freedom of movement while offering superior upper body protection. The easy-on-off design of the detachable chest and back protectors, in combination with the base layer's central zip enhances the practicality of this jacket, while ensuring the young rider is fully protected. The jacket incorporates Nucleon Flex Plus CE/UKCA Level 1 certified should and elbow protectors. The sleeves are super low profile, compact, and highly vented to maximize comfort under the jersey, and feature a cool graphic for those that choose to wear it alone in warmer temperatures. The Youth Bionic Tech is a super comfortable and highly protective jacket thanks to its low profile, ultra-lightweight, and highly ventilated design.
- + The use of Polyhedron Hybrid Technology results in the Bionic Tech Youth Protection Jacket being one of the lightest, most ventilated, and most protective protection jackets in its class. The

dual-zone chest protector has a rigid central zone, with a flexible soft compound around the perimeter backed by a soft bio-foam padding which works as an adaptive system that molds to the chest. The central zone of the chest protector directly behind highly perforated impact grid is completely open to allow for maximum ventilation.

- + The new highly perforated Level 2 CE/UKCA certified back protector is constructed from a flexible and adaptive viscoelastic material offering superb ventilation and weight-saving properties.
- + The chest and back protectors are securely held in via place adjustable shoulder straps. Lower securement is actioned via the easy-connect buckles and V-straps that also secure the rib guards in place. The V-straps spreads the tightening force over a wider area of the back protector resulting in a more secure and comfortable fit. The rib guards offer additional coverage in critical areas.
- + SHOULDER PROTECTORS: EN 1621-1:2012 Level 1
- + ELBOW PROTECTORS: EN 1621-1:2012 Level 1
- + BACK PROTECTOR: EN 1621-2:2014 Level 2
- + CHEST PROTECTOR: EN 1621-3:2018 Level 2

- + Lightest CE Level 2 Chest Protector in its class.
- + 17% of the protector structure consist of ventilation apertures and are aligned through both hybrid layers to ensure maximum ventilation.
- + Super ventilated with channeling of direct heat build-up away from the chest.
- + Viscoelastic back protector is highly adaptive, ventilated, and flexible.
- + YNS compatible via removable puck panel and elasticated YNS pull tabs.
- + Chest and back protectors can be detached from the base layer for easy washing of the jacket.
- + V-straps on the back protector make for a more adaptive fit
- + Race-proven breathable and stretchable textiles used for the base layer construction.
- + Floating Chest and Back protectors, and rib guards
- + Nucleon Flex Plus CE/UKCA Level 1 certified shoulders and elbow protectors

BNS TECH-2 NECK SUPPORT

size
XS - XL

price
\$ 329.95

- + The BNS Tech-2 is constructed from an advanced, high-performance fibre polymer compound to offer:
- + Complete design facelift & technical upgrading including lightweight rear and chest padding and updated chinplate design.
- + Structural integrity and frame strength against heavy impact energies during a crash.
- + Ultra-lightweight performance and comfort while riding.
- + Less weight than its predecessors.
- + Resilience to low temperatures, below 0°C.
- + The BNS Tech-2 is designed to provide a customizable, secure and personalized fit with the SAS (SZ Adapter

System) for a versatile fitment in SZ ranges XS-M and L-XL.

- + The Lycra®-laminated foam padding kits are adaptable and the interchangeable EVA foam pads allow compatibility with body protection systems.
- + The lightweight Strap System can be worn over or under the jersey.
- + The BNS Tech-2 incorporates a bio-organic engineering design for superb ergonomics:
- + Rear stabilizer promotes PFR (Progressive Force Relief) and dissipates energy loads by transmitting them across the back and shoulders and away from spine (thoracic vertebrae), and is connected to the frames via pivot key.

- + Frame construction promotes improved contact with helmet during impact – including rear support edge that fits closer to the body, extra width to account for different helmet SZs and raised chest to reduce hyper-flexion.
- + Innovative quick-release locking system for rapid and efficient fitting/removal offers secure and convenient closure.
- + Compressed EVA foam compound padding to distribute the impact force over the widest area, yet remain lightweight.
- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:
- + Category 2 under the PPE Directive EU 2016/425.

+ Designed and developed for a fit that is specific to a youth rider's anatomy.

+ Frame constructed from injected polymer compound that has been extensively impact tested at performance on a range of off-road surface and varying temperatures.

+ Frame has been ergonomically engineered to promote contact with the helmet during impact – including rear support edge that fits closer to the body and raised chest to avoid hyper-flexion injuries / thus providing a solid surface which instantly channels damaging, compressive impact energy away from the neck and on to the support.

+ Frame's anatomical profile promotes positive helmet contact in event of a crash while allowing rider freedom of movement.

+ Rear stabilizer system helps keeps support in position and is also designed to channel extreme energy loads away from the spine by transmitting

it across the shoulder and helping to avoid serious spinal injury.

+ Ultra-lightweight EVA foam on the support's underside for comfort and positioning and to distribute the impact force over the widest possible area.

+ Closure system for convenient engagement of support and to facilitate quick removal in case of emergency.

+ The support is supplied with the easy-to-use strap system which allows use over or under the jersey to secure the device on the rider.

+ The Youth Neck Support can be easily integrated with the A-5S Youth Body Armour to ramp up a young rider's overall protective coverage.

+ According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:

+ Category 2 under the PPE Directive EU 2016/425.

+ Hybrid children's neck protection with extended tail for position stability.

+ Ergonomic design and engineered shape to fit kids from 6-10 yrs and from 10-14 yrs.

+ Double density core is made from a soft PU foam base embedding a hard layer EVA for energy dissipation.

+ Bottom and internal soft section (neck side) provides comfort for the shoulders

and neck, a hard section on the upper part to give stability and provides force distribution when the helmet impacts.

+ Easy to use soft strap closure on the front part.

+ Highly compatible with all other Alpinestars protectors and jackets.

+ External cover can be removed for washing by hook and loop grip opening on the rear.

BIONIC-10 CARBON KNEE BRACE

size price single price set
S - 2XL \$ 429.95 \$ 834.95

- + Structural hybrid frames are constructed from a composite over-injected with a high performance fiber reinforced polymer which provides optimal structural integrity and support while being ultra-lightweight.
- + The Bionic-10 Carbon Knee Brace comes in 4 different SZs: S, M, L and XL/2XL for perfect fitment.
- + The asymmetric frame design ensures a wide range of unique leg shape compatibility and a perfect fit.
- + Slim ergonomic design offers a high level of riding comfort during dynamic movement.
- + The open structure and perforated areas promote maximum ventilation.
- + Extremely stable slim-design 4-point hinge system perfectly follows the articulation of the knee.

- + Hinge system incorporates easily exchangeable extension stops (0, 5, 10, 15, 20, 25 and 30 degrees) which reduces the risk of sustaining injuries to:
 - + The medial and lateral collateral ligament
 - + The anterior and posterior cruciate ligament
 - + The lateral and medial meniscus
- + Lightweight and highly ventilated double-wall knee-cup system offers strong impact force dispersion and absorption while ensuring maximum coverage area in all riding positions.
- + The ergonomically sculptured triple segment knee cup is designed for flexibility and adaptivity and constructed from a double density polymer solution for high impact force dispersion on rigid external shell and energy absorption on semi-rigid internal shell structure.

- + The knee cup is accurately secured in place by an innovative integrative mechanical guiding system that keeps the knee cup in correct position while providing controlled freedom of movement.
- + Calf Frame strap system holds braces perfectly in position and avoids slipping down when rider is in action and extreme movement.
- + The two calf straps are linked with a semi-rigid C-shaped connector that dynamically shapes towards the dimension change of the calf muscle.
- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product:

+ The CE and UKCA certified Level 1 Bionic Pro Protection Shorts boast a lightweight, highly flexible design which provides impact and high abrasion protection within a breathable mesh sleeve for excellent levels of airflow and comfort. These shorts are equipped with built-in CE and UKCA certified hip protection and strategically positioned padding on key areas that are prone to impact-injuries; this is the result of extensive studies into the typical crashes experienced by riders when competing on the track.

+ CE certified hip protectors.

+ Comfortable Enduro oriented chamois padding.

+ Strategically placed padding on areas prone to impact injury as a result

of studying typical crashes on a track.

+ Belt and side padding on hip splits the protection into two while still providing complete protection while not hindering freedom of movement.

+ Two-part slip joint overlapping construction on the hip protectors where protector meets stretch mesh chassis for enhanced freedom of movement.

+ Soft touch fabric

+ Elasticated straps

+ Polygiene Biostatic™ Stays Fresh Technology

+ Stretchable lower thigh hem for compatibility with knee braces.

+ Multi-panel, body-mapped design fits under pants for additional coverage and compression fit support.

+ Constructed from technical elastane stretch mesh main shell for breathability and flex fit.

+ Strategically positioned thermoformed foam padding incorporates vents for his levels of cooling airflow.

+ Perforated viscoelastic inserts on upper thigh and hip for

additional coverage and fit.

+ Multi-density chamois padding is ergonomically designed for various riding positions and unrestricted movement. Padding features air channeling on the inner side for breathability.

+ Elastized waist and silicone lower hem helps keep shorts in position.

+ Reinforced stitching for seam strength and durability.

TECH 10 SUPERVENTED BOOT

size
7 - 14

price
\$ 699.95

- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017.
- + Construction uses a highly breathable, perforated microfiber.
- + TPU features is combined with ventilation zones and a new air flow system sole for breathability and superior ventilation.
- + Evolutionary new shin plate design with ventilation windows strategically positioned to allow more ventilation without compromising the impact protection.
- + Air vents on the TPU lateral calf plus breathable mesh insert improve comfort and reduce fatigue on short and long rides.
- + New performance double pivot motion control system features:
 - + Medial and lateral double pivot system for improved levels of flexibility and precision control.
 - + Engineered bi-density front flexion control is strategically positioned over the mesh area, combined with a dual front blade system and shock absorber insert to offer mechanical progressive force release to dampen and absorb impact energies.
 - + Re-designed dual density TPU rear blade system is engineered to prevent hyper-extension while offering improved flex control and impact resistance.
- + Built into the Tech 10's unique and lightweight single-piDOT / ECE co-injected foot chassis is the patented Dynamic Heel Compression Protector (DHCP), an innovative safety feature which includes a fully integrated collapsible heel area with expanded polyfoam to absorb high impact energies during a crash.
- + DHCP features a directional impact protection system which

significantly reduces the effect of excessive, potentially injury-causing energy being transferred to the ankle and lower leg.

- + DHCP has been developed and tested in the demanding circuits of professional Supercross and Motocross.
- + Co-injected for strength and structure, the exclusive TPU and rubber compound panels provide superb levels of grip contact, durability and heat resistance.
- + The contoured calf protector ergonomically wraps around the rear leg and is constructed from a dual density compound rear blade system to offer progressive dampening of excessive torsional forces.
- + Shin plate features a new anatomic design for reduced surface area and weight-saving.
- + Completely re-designed sole with proprietary grip sculpturing to improve foot-peg performance, grip and mud and water run-off.
- + Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support. The sole offers superior durability, grip and feel while riding, and improved performance on the shifter.
- + The central sole insert features a micro grip and side hooking grip design. It is easily replaceable and Alpinestars offers a full sole replacement and boot repair service.
- + Anatomically optimized for weight-saving and ergonomics, the new mechanical buckle closure system features a nylon and fiberglass compound for improved durability and strength.
- + The new slim-line buckle closure system includes high-impact bridge closures which are cold forged for precision and strength.
- + The buckle closure system features a memory and a

quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.

- + Innovative, lightweight upper combines advanced lightweight microfiber with an impact and abrasion resistant TPU shell.
- + The foot shell features five different compounds in a single lightweight piDOT / ECE to offer strength while maintaining flexibility and structural integrity.
- + The foot shell incorporates heel and toe protection and is highly resistant against abrasion and impact while adding to the boot's overall durability.
- + The foot shell also includes an integrated shank for support and structural integrity.
- + Frontal protection features a dual closure system with an internal microfiber flap, plus hook and loop fasteners for a precise fit closure attached securely with a micro-adjustable, easy to operate, lightweight buckle.
- + The shin incorporates a unique TPU blade system engineered to prevent frontal hyper-extension and offer greater flex control.
- + Soft microfiber gaiter helps seal out excessive water and dirt entry, while the 3D mesh lining ensures improved air circulation and comfort.
- + mesh lining incorporates anti-sliding suede on heel area to keep the foot located inside the boot.
- + Highly ventilated perforated padding for optimized ventilation and airflow.

REDESIGNED BIOMECHANICAL INNER ANKLE BRACE SYSTEM

Lighter, anatomically redesigned medial and lateral torsion bars for ankle and leg rotation and progressive damping of torsional forces during an accident, while still allowing natural freedom of movement.

Low-profile, pull-on design for reduced material build, less weight and to facilitate easier and quicker wearing.

Innovative flexion inserts work seamlessly with Tech 10's flex support system for ultimate in performance.

TPU protection and shock absorbing padding on the heel and ankles and an ultra-thin and flexible forefoot area for increased sensitivity and control.

Dual compound removable anatomic footbed includes EVA for comfort and support and aids even weight distribution.

- + Lightweight upper combines suede leather with light-weight microfiber for impact and abrasion resistant TPU shell.
- + Innovative, evolutionary TPU shin-plate construction for greater range of fitment features a reinforced hook and loop closure for comfortable, highly customized closure.
- + Soft microfiber gaiter helps seal out excessive water and dirt entry.
- + Evolutionary design for lateral flex zone provides front and rear flexion support and helps prevents torsion.
- + Medial-facing panel constructed from TPU with rubber insert for maximum grip contact with bike and improved heat and abrasion resistance.
- + Contoured TPU calf protector plate offers impact resistance.
- + Extensive TPU protection on toes, foot, heel, ankle, calf and shin with extra hard compounds on the toe-box, heel and achilles tendon.
- + Closure system includes polymer buckles plus aluminium frame with innovative self-aligning, quick release closures for customized secure fitment.
- + All the buckles are replaceable.
- + TPU lower shell is reinforced with metal shank and includes toe reinforcement for impact and abrasion resistance.
- + Poly fabric lining with 3D open cell foam incorporates anti-sliding suede reinforcement on heel area.
- + Exclusive dual compound sole is seamlessly integrated to the multi-density foot base structure with built-in support; the sole superior durability and grip.
- + Main flexion of the boot is supported around medial and lateral ankle by low profile pivot system which dissipates friction when bending the boot.
- + Shock absorbing padding on the heel and ankles plus an ultra thin and flexible forefoot area for increased sensitivity and control.
- + Removable anatomic footbed in lycra on top.
- + Replaceable footpeg insert on sole is constructed from hard compound vulcanized rubber for durability and protection.
- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017.

TECH 7S BOOT

- size

2 - 8
- price

\$ 249.95
- + Tech 7S is specifically designed and SZd for junior and /or smaller framed riders.
 - + PU-reinforced microfiber upper for flexibility, abrasion resistance, water-resistance and weight-saving. Material ensures consistent fit and is easy to maintain and clean.
 - + Contoured shin plate is injected with high modulus TPU for excellent levels of impact and abrasion resistance.
 - + Medial facing side incorporates TPU panel with specially designed sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.
 - + One-piDOT / ECE injected dual compound foot shell with co-injected hard toe protector and integrated steel shank. The shell is highly resistant to abrasion and impact, and adds to

- the boot's overall durability and improves boot's streamlining.
- + Excellent flexion provided by low profile medial and lateral pivot system to offer movement and support.
 - + Instep and Achilles accordion flex zones constructed for superior control and support.
 - + Extended microfiber gaiter helps seal out excessive water and dirt entry.
 - + Soft poly foam reinforcement on ankles and collar for long lasting comfort and shock absorption.
 - + mesh textile with open cell foam for improved air circulation and comfort.
 - + Buckle closure system incorporates polymer and fiberglass

- buckle arms and high-impact aluminum bridge closures for durability and weight-saving. Buckle system features memory and a quick release/locking system with self-aligning design for easy, precise closure and improved riding performance and security. All buckles are easily replaceable.
- + Compound sole is seamlessly integrated into the base structure for superior durability, high performing rubber grip patterning, and feel. The sole is replaceable.
 - + Removable anatomic footbed for comfort and support ensures even weight distribution.
 - + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

SZ ADJUSTER FOOT BED TO REDUCE
THE INTERNAL VOLUME BY ONE SZ.

- + Designed specifically for junior riders.
- + Upper construction is made from innovative and light microfiber material that is flexible and abrasion resistant.
- + Light microfiber on front and rear bellow gives more comfort on the flexible area.
- + Toe box is made of synthetic material for high abrasion.
- + Extended PU synthetic gaiter helps seal out excessive water and dirt entry.
- + Contoured TPU calf protector plate, TPU higher medial protector, TPU outer lateral ankle and TPU heel counter offer support and resistance to impacts.
- + Rear TPR gaiter patch applied on top of the TPU calf protector gives protection and comfort on rear flex.
- + Injected TPU shin plate connected with the TPU medial protector panel; Hook and Loop closure upper closure, plus

TPR flap for broad ranging calf fit adjustment and support.

- + The TPU higher medial protector is designed with technical texture for improved grip.
- + Bio-mechanical medial blade system allows a good front rear flex giving support and protection to the ankle.
- + The ergonomic TPU triple buckle straps wrap the front flex from the medial protector to the lateral side without compromising the flexx.
- + Closure system includes 3 polymer buckles with an innovative closure system.
- + This closure includes a ratchet with memory and a quick release/locking system with self-aligning design for easy, precise closure.
- + All the buckles are replaceable.
- + Innovative one-piDOT / ECE TPU injected

dual compound foot shell, reinforced by a metal shank inside a co-injected toe reinforcement.

- + Soft foams surrounds the ankles and collar offer comfort and shock absorbing performance.
- + Entire textile lining for more comfort.
- + Replaceable anatomical EVA footbed.
- + Additional specially modified smaller footbed to accommodate growth and extended longevity of product (only available in boots SZ: 2-3-4).
- + Exclusive high grip rubber compound outsole.
- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2010.

TECH 7 ENDURO DRYSTAR® BOOT

size 5 - 16 price \$ 459.95

- + Upper constructed from light, innovative micro-fiber that is flexible and abrasion resistant.
- + Innovative, evolutionary TPU shin-plate construction for greater range of fitment features a reinforced hook and loop closure for a comfortable, highly customized closure.
- + Specifically designed sole provides Enduro riders with superior durability, grip, feel and a high level of structural rigidity.
- + Wide entry aperture for convenience with hook and loop upper closure TPR flap to allow a broad range of calf fit adjustment and support.
- + Medial-facing area constructed from one-piece TPU panel with honeycomb sculpturing for maximum grip contact with bike and improved heat and abrasion resistance.
- + Top rear flexion of the boot is supported

around the calf by an innovative TPU sliding blade system which dissipates friction.

- + Ergonomic buckle system offers a secure and highly personalized closure.
- + Innovative TPU lateral ankle protection provides a bio-mechanical link between the middle lateral and the bottom lateral of the boot. The instep and Achilles accordion flex zones are constructed for superior control and support.
- + TPU lower shell is reinforced with a metal shank and includes toe reinforcement for impact and abrasion resistance.
- + Extended microfiber gaiter helps seal out excessive water and dirt entry.
- + New closure system includes polymer buckles plus an aluminum frame with innovative self-aligning, quick

release closures for a customized secure fitment.

- + All buckles are easily replaceable.
- + Drystar® membrane subtly incorporated into chasis for 100% performance against wet penetration.
- + Soft polyfoam surrounds the ankles and collar to offer comfort and shock absorbing performance.
- + Removable anatomic footbed.
- + Exclusive high grip rubber double density compound outer sole.
- + Sole and footpeg are replaceable.
- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply: EN 13634:2017.

TECH 3 ENDURO WATERPROOF BOOT

size 5 - 16
price \$ 299.95

- + Upper construction is made from innovative and light microfiber material that is flexible, offering high levels of abrasion and water-resistance, durability, and improved weight-savings.
- + Waterproof membrane provides wet weather performance.
- + Light microfiber on front and rear bellow gives more comfort on the flexible area.
- + New innovative closure system includes an aluminum frame with self-aligning, quick-release closures incorporating a ratchet with memory for a customized, secure fit; all buckles are replaceable.
- + The ergonomic TPU triple buckle straps wrap the front flex from the medial protector to the lateral side without compromising the flex.
- + Dual compound sole is seamlessly integrated

into the base structure for superior durability and performance as well as grip and feel.

- + Toe box is made of synthetic material for high abrasion.
- + Extended PU synthetic gaiter helps seal out excessive water and dirt entry.
- + Contoured TPU calf protector plate, TPU higher medial protector, TPU outer lateral ankle and TPU heel counter offer support and resistance to impacts.
- + Rear TPR gaiter patch applied on top of the TPU calf protector gives protection and comfort on rear flex.
- + Injected TPU shin plate connected with the TPU medial protector panel; hook and loop upper closure, plus TPR flap for broad ranging calf fit adjustment and support.
- + The higher TPU medial protector is designed with technical texture for improved grip.

- + Bio-mechanical medial blade system offers good front rear flex giving support and protection to the ankle.
- + Innovative, one-piece TPU injected dual compound foot shell, reinforced by a metal shank inside a co-injected toe reinforcement.
- + Soft foam surrounds the ankles and collar offering comfort and shock absorbing performance.
- + Entire textile lining for more comfort.
- + Replaceable EVA footbed with textile lining on top.
- + Exclusive high grip rubber compound outsole. The sole is replaceable.
- + The TECH 3 Enduro Waterproof boot is CE certified to EN 13634:2017.

TOUCAN GORE-TEX BOOT

size 7 - 13 price \$ 539.95

- + Innovative lateral ankle protection with a supporting bio-mechanical link between the upper boot and the lower foot structure provides support and control.
- + Medial side structure is contoured for perfect fit and flexibility fit, with reinforced polymer and rubber sculpturing for grip and protection against impact.
- + Advanced TPU protection layer covers the internal heel counter and toe box enhancing support and rigidity in key impact areas.
- + Coated leather panel forms the outer surface of the toe box providing effective abrasion and weather resistance.
- + Heel is encased in a moulded external protector for increased impact dissipation and absorption.
- + Ankle protector is carefully shaped around the ankle bone, with reduced volume, to optimize protection and comfort.
- + High modulus shin guard incorporates an innovative, vertical, flex blade system offering improved forward and rearward

- control and a high level of impact and abrasion resistance.
- + Advanced instep and Achilles accordion flex zone construction, made of soft microfibers, gives superior comfort, control and support.
- + Medial surface stamped on top calf suede panel improves grip and protection.
- + Wide entry aperture for convenience, with secure upper TPR and hook and loop closure flap to allow broad ranging calf fit adjustment and support.
- + Boot can be worn under and over riding pants and denims for adaptability.
- + Closure system features two polymer buckles plus aluminum frames with innovative self-aligning, quick release, closures for customized and secure fitment.
- + Screw fixed buckle base is replaceable.
- + Upper collar and inner lining are formed with

- breathable mesh for riding comfort and freshness.
- + Full waterproof and breathable Gore-Tex lining ensures 100% moisture protection while maintaining high levels of perspiration exchange.
- + Removable anatomic structured footbed.
- + Internal toe box and heel counter are built-in, under the outer skin for robust protection.
- + Alpinestars new and exclusive compound rubber sole for optimal combination of control and grip.
- + Unique Alpinestars advanced sole construction, fully perimeter stitched, is fully replaceable. The sole construction includes a structured midsole and rigid insole with an integrated steel shank for excellent feel and rigid comfort and safety.
- + According to European statutory law the CE mark is a conformity requirement for the marketing of this product. The following standards apply to this product: EN 13634:2010.
